

Outdoor Ceramics 2 cm, 3 cm and 5 cm
Vitrified Porcelain 2021 | 1.0

Marcryst - A Leader in Diamond Tools

Marcryst are a technology leader of diamond tools.

In a 4½ year R&D and development programme, Marcryst have pioneered professional diamonds and system solutions for cutting, grinding, drilling and dressing 2 – 5 cm vitrified porcelain paving (outdoor ceramics).

Because of its hard wearing properties; heat, frost, scratch, stain and discolouration resistant, vitrified 2 cm, 3 cm and 5 cm porcelain paving is rapidly replacing conventional outdoor surfaces.

The only issues with outdoor ceramics, until now, was its hardness and the associated difficulties and costs in cutting or drilling it.

We take pride in presenting the fruits of our R&D work. A range of diamond tools which make laying and working with vitrified paving as easy as working with conventional natural stone or concrete paving.

Marcryst diamonds and machinery are designed to make working with vitrified porcelain paving easy, quick and cost efficient.

Marcrist Guarantees

We trust in our products and their performance, we would like you to do the same.
That is why we are offering the outstanding Marcrist Guarantee.

Test any of our outdoor ceramic and vitrified porcelain paving products with this guarantee seal for 30 days, put them through the toughest tasks. If you are not fully satisfied, you will get your money back. Guaranteed!

Lifetime Guarantee against manufacturing fault.
Register your machine online within 30 days of purchase to
enjoy your lifetime guarantee against manufacturing fault.

Marcryst Technical Support

Need technical support?

Contact Marcryst and ask for 'Technical Support' for any questions or problems related to diamonds. Our team are experts, many with lifelong diamond knowledge. If we are unable to solve your problem over the phone, we will normally have an engineer on your site within 48 hours.

Vitrified pavers are durable, scratch resistant and hard wearing, but can be extremely hard to cut...

THE FZ FAMILIES ARE THE WORLD'S ONLY DIAMOND BLADES THAT CAN CUT THEM PRECISELY, ACROSS ALL TYPES OF MACHINES.

The FZ850 blades are designed for outdoor ceramics 2 cm, 3 cm and 5 cm vitrified porcelain.

300 mm diameter & above, you must use water wherever possible if the machine facilitates it because:

- A) Health and Safety at work highlights the need for dust suppression
- B) Aids performance and life of the blade
- C) The premium porcelain material manufacturers insist on products being cut wet

Diamond Drilling Of Outdoor Porcelain Paving

Marcryst have developed cost efficient, high speed diamond drilling solutions for all types of outdoor porcelain paving slabs. Rotary only, without hammer, to prevent slab damage and chipping.

Fixing hole drilling Ø 8 mm

- Fencing gates
- Glass partitioning and pool enclosures
- Stand-up lighting, etc.

TD850V

Through hole drilling:

Ø 6 mm – 36 mm - PG850

Ø 48 mm – 162 mm - PG850V

- LED lights
- Spotlights and uplighters
- Downpipes
- Waste pipes
- Inspection covers
- Manhole covers
- Flower troughs
- Special sizes available on request

PG850

PG850V

TD850V Drills for Outdoor Ceramics and 2 - 5 cm Vitrified Porcelain

The ideal drill for drilling fixing holes!

- Drilling Ø 8 mm fixing holes in seconds
- Self-centring, drills with pinpoint accuracy
- Works with all drills corded and cordless
- Drills 10 – 20 holes in 2 cm outdoor porcelain
- Drills without percussion to prevent chipping
- The perfect cost effective solution for users needing to drill only a limited number of holes
- Ideal rpm 1400 – 1500 rpm

Must be used wet with sufficient water and with an oscillating motion

TD850V Drill for Drilling Fixing Holes

Why buy me:

- The perfect tile drill for drilling fixing holes
- Self-centering
- Won't slip or scratch tiles

Granite & natural stone

Porcelain

Mosaic

All Tiles however hard

Drills between **10 - 20** holes in 2cm outdoor porcelain

The "Rolls Royce" of Bridge Saws

For 45 years Zuber Germany has stood for world quality leadership in landscaping bridge saws.

- Rustproof –

Every Zuber/Marcris saw is hot dip zinc galvanised and powder coated

- Ultimate Precision –

Precise chip-free cut with TCM1200 and CK850

Stainless steel, maintenance free precision carriage for a cut precision of 2/10 of a mm

- Depth adjustment at the feed handle –

Perfection in every detail. Everything is designed with ease of handling and precision in mind

- Precision mitre cut –

Ultimate cut precision, chip and tear free

- Precision plunge cut –

One man loading

Foldable legs and transport wheels ensure easy transportation

**You can buy a new standard saw every 2-3 years ...
or a Zuber every 20-30 years.**

STM1250 The Ultimate Precision Bridge Saw

- Sturdy, replaceable stainless steel guide rail • 1250 mm cutting length
- Vibration and noise reduced • Removable water tub with • separate pump compartment

The image shows a diamond blade and a side table. These are not included with the machine but can be purchased separately.

Separate pump compartment	Yes
Transport lock for cutting head	Yes
Size Length x width x height	1782 x 780 x 1200 mm
Total weight	111 kg
IP55 thermal protection RCCB	Yes
Vibration and noise reduced	Yes

Part Number

8044.001.003

Contents include: **STM 1250**
stone cutting machine.

⁽¹⁾For further Segment height information see page 12. ⁽²⁾Product recommendations may vary according to user and/or machine and/or materials.

⁽³⁾GB Patent-No. GB2382544.
